Software for a deer processor and custom butcher

An animal comes in; its owners' meat goes out.

What it does

- Drop-off with the tag and the game-check confirmation number - or "checked by phone, number to follow", which the office chases with a button, never by itself.
- A cut sheet per species that the hunter fills on their phone from a link or QR code; moving the ticket to Cutting locks it, and only a manager can change it...
- Shares: a farmer's steer sold in halves or quarters, each buyer its own ticket with the date they became the owner, their own cut sheet, bill and boxes - and...
- It helps you keep the records - it does not make you compliant.

Price

$695 a year or $3,475 once, one site.

Pro, which also carries the language packs, $1,195 a year or $5,975 once.

Founding customers

The first five businesses to choose TEG-BUTCHER get their first year at half price - $347.50 instead of $695.

In return: a short selfie testimonial - a quick video on your phone, or a written quote with a photo, whichever is easier for you - permission to name you as a customer, and your honest feedback. We will e-mail you now and then to ask how it is going, and our feedback page is always open for comments, criticism and suggestions - all very welcome.
