Software for running a farmers market

Run the market - stall bookings, the till and every trader's payout - from your own website.

What it does

- Three kinds of ownership on one till.
- The owner and the commission are frozen onto each sale line, so a payout worked out in November cannot change because somebody edited a price in July.
- Tax worked out per line, not on the total, because food is usually exempt and the rest is not.
- Stalls, market days and bookings, with a double booking refused and the rent owed feeding straight into the payout.
- Every trader gets their own statement on a private link.

Price

$249 a year or $1,245 once, one site.

Pro, with TEG Back Office and the language packs: $449 a year or $2,245 once. A free 30-day Pro trial is built in, with no sign-up.

Founding customers

The first five businesses to choose TEG-MARKET get their first year at half price - $124.50 instead of $249.

In return: a short selfie testimonial - a quick video on your phone, or a written quote with a photo, whichever is easier for you - permission to name you as a customer, and your honest feedback. We will e-mail you now and then to ask how it is going, and our feedback page is always open for comments, criticism and suggestions - all very welcome.
